

Digital Stand Alone Clocks

“Save time and money”

Problem

- Hard to read
- Clock loses memory with power outage
- Clock doesn't change for DST
- Clock difficult to access
- Clock gains / loses time

Solution

- 7" digits visible over 500 feet away
- 10 Year lithium battery prevents memory loss
- Automatic daylight saving time correction
- Optional remote control
- One second a year accuracy

-Other sizes available

Other Products:

-Count up/down timers

-Punch clocks

-Accessories, etc...

Recommendation for curling club applications:
7.0" digit height displaying hours & minutes.
